

【2017 Medical Science Syllabus】

Subject	Innovation and industrial application			Class Style	Lecture (Omnibus style)
Classroom Language	Japanese	Credits	1 credit	Semester	September – November
Supervisors	Takahiro Yasuda	Day/ Period	To be announced later.		
Instructors	To be announced later.				
Theme and Objectives	<p>This lecture is designed to provide young PhD students with a unique opportunity to get updated with the recent R&D activities of the biomedical industry as well as the current status and future perspectives of academia-industry partnership. In order to ensure effective learning of broad knowledge on actual R&D effort and innovation, multiple senior leaders, who are currently dedicated to the front line of R&D for sparking biomedical innovation in the industry, hospitals and government, will be invited as lecturers of this omnibus-styled class. Active participation in the Q&A session is welcome to create atmosphere for interactive learning.</p>
