Yogyakarta (Indonesia)-Kobe (Japan)
2013 December 5th

**Education of Global Medical and Health Science Leaders
in the Coming Generation
in Cooperation and Collaboration with ASEAN countries**

Ahmad Hamim Sadewa, MD., Ph.D

FOREWORD

Takayoshi Kuno, MD., Ph.D

Distinguished Faculty board members of both universities;
Distinguished Staff of the faculty of both universities;
Eminent Professors of both universities;
Beloved students of the two universities; and all other distinguished guests.

It gives us enormous pleasure, on behalf of The Faculty of Medicine, Universitas Gadjah Mada and The Graduate School of Medicine, Kobe University to extend you a very warm welcome to the Indonesian-Japan Teleconference Symposium of Global Leader Education Program 2013 between Universitas Gadjah Mada and Kobe University. This program has been launched as one part of the commemoration of the 30 years collaboration between the two institutions. Both institutions have agreed to conduct various kinds of collaboration in various areas, such as in the education, research, as well as in the community service areas started from 30 years ago. During that period, Kobe University and Universitas Gadjah Mada have been closely and intensively doing tremendous efforts in order to get the best of things out of the scheme of the collaboration.

Within the establishment of new collaboration program under the Ministry of Education, Sport and Cultures (MEXT) Japan, entitled “**Education of Global Medical and Health Science Leaders in the Coming Generation in Cooperation and Collaboration with ASEAN countries**” (led by **Prof. Hak Hotta, Kobe University**), the new power has been added to strengthen the mutual collaboration between Universitas Gadjah Mada and Kobe University. In the form of student exchange, scholarship, research collaboration, we believe that cooperation between Universitas Gadjah Mada and Kobe University will bear a fruitful advance in the development not only research but also education program for the better upcoming generation of health science and medical leaders in the future.

We hope, by full-utilizing this teleconference, we will have productive discussion to have better understanding of each other to find out mutually beneficial future course to achieve our purpose; to educate leaders of next generation in health/medical research and education.
