

<b>Pharmaceutics</b>	
<b>Length:</b>	2 weeks
<b>Prerequisite</b>	
	Medical students on the grade already qualified for bedside clinical clerkship.
<b>Purpose</b>	
	To provide students an excellent experience of contemporary clinical pharmaceutical care in Japan.
<b>Competencies</b>	
	Students will be expected to gain a better understanding of clinical pharmaceutical care.
<b>Schedule in general</b>	
	Pharmaceutical practice will start at 8:30 AM. Clinical problem solving, seminars on special fields and board review course are held weekly. Students then participate in prescription work, chemotherapy managements, therapeutic drugs monitoring, bedside pharmaceutical care and other pharmaceutical managements. Official duty hours will be over at 5 PM.
<b>Assessment</b>	
	We assess students comprehensively observing his/her knowledge, skills, behavior, or all other things relevant to medicine. We do not provide formal, written assessment unless required by the schools sending forth students. We also would like students to assess us, and welcome feedback, both positive and negative.
<b>Requirements</b>	
	Night Call: no    Weekends: no
