 Faculty 12
 Assistant etc. 22

The 9th Kobe International Endoscopy Hands-on Seminar was attended by 18 trainees from 9 countries including Australia, Hong Kong, Brazil and the UAE.

On June 7th, the first day of the seminar, an Evening Seminar was held. Three speakers gave presentations and answered questions. SESSION 1 Tips and troubleshooting for Esophageal and Gastric ESD-including Barrett's esophageal cancer-Takashi Toyonaga(Kobe University Hospital) host Tomoki Michida(Osaka International Cancer Centre)/Yoko Kitamura(Nara City Hospital)

SESSION 2 Tips and troubleshooting for colorectal ESD Naohisa Yoshida(Kyoto Prefectural University of Medicine)Host Hirohisa Machida(Machida Gastroenterology Hospital)/Shusei Fukunaga(Osaka Metropolitan University)

SESSION 3 Endoscopic full-thickness resection of gastric submucosal tumor-current situation and future perspective-Noriya Uedo(Osaka International Cancer Centre) host Kingo Hirasawa(Yokohama City University Civic General Medical Centre)/Yoshinori Morita(Kobe University Hospital)

From June 8th to 9th, ESD hands-on training was carried out using tissues and live pigs. The training was composed of forty-minute per session, once in the morning and another in the afternoon, so that each participant could receive one to one guidance from instructors, and they were divided into groups in order to receive the guidance from another instructor on the second day.

For lunch, A luncheon seminar was held.

June 8th

Fundamental principles of endoscopic submucosal dissection (ESD): Efficacy of Vonoprazan for esophageal reflux disease and gastric ulcer. Katsumi Yamamoto(JCHO Osaka Hospital) host Eiji Umegaki(Kawasaki Medical School)

June 9th

Effective Management of Adverse Events in ESD Osamu Goto(Nippon Medical School) host Yoshinori Morita(Kobe University International Clinical Cancer Research Center: ICCRC)

In a post-completion survey, all participants gave high marks.
