Founding and Building Successful Biotechnology Companies: A personal history

Date:

Tuesday, June 11
16:00~17:00

Venue:

Shinryoku

Memorial Hall A

Kobe University Graduate
School of Medicine

The lecture will cover the basics of starting and growing a biotech company, focusing on the importance of intellectual property and experienced biopharmaceutical leaders. The speaker, who has founded several successful biotechnology companies, will also discuss the importance of courses at MIT that teach biotechnology and entrepreneurship.
